---

Thank you Dawn! I have just a few label comments for the new sublabel for PestConnect:

1. On the front panel please delete "We reserve the right to change the construction and/or configuration....". These type of changes would have to be reviewed by the Agency. The same thing would apply to any rodenticide bait sold with a bait station (i.e. changes to either the bait or station would have to be reviewed by the Agency).
2. On page 3 please revise "...Technician visits the customer premise's to clear any mice activity" to "Technician visits the customer premise's to clear the RADAR Connect trap....."
3. On page 4 please change "continuous protections" to "continuous protection".
4. On page 5 please change "When an activity" to "When activity".
5. On page 5 please revise "mains" to "AC powered". Actually, go ahead and replace all of the "mains" with "AC powered".
6. On page 10 please revise "so it is important to take time to be happy with the locations you have chosen" to "it is important to position the repeaters in locations that provide a good radio signal".
7. On page 14 please revise "However, radio doesn't like going through metal" to "radio signal doesn't easily pass through metal".
8. On page 16 the statement "It is important to remember that radio waves do not respect building boundaries. Just because a system is all set up in one building won't mean that it will connect that way" reads a bit confusing. I think I understand that you are trying to say that "the system placed in one building may intercept signals from a system placed in *another* building and vice versa". Is that correct? Maybe something like "it is important to remember that signals from one system may affect signals from another system, particularly if the two systems are placed close to each other".

If you can email me a clean label I'll get it to John for stamping! Let me know if you have any questions about these comments.

Thank you,

Hello Gene

Here are the Pest Connect Manuals, as requested.

Sub-label A is the manual for RADAR (non-radio version)

Sub-label B is the manual for RADAR (Pest Connect version).

We would supply the correct part according to which version of RADAR we are using.

Thanks for the email. Have a nice day.

Hi Dawn,

I have your amendment to add a new instruction manual for the "PestConnect" unit. I spoke with John about this, and we both think it will be more clear if you can provide 2 separate instruction manuals, "sublabel A" for the current (non-radio) manual and "sublabel B" for the new PestConnect manual.

If you can email me both manuals, each alternately marked "sublabel A" and "sublabel B" on the front page I can review/stamp it for you pretty quickly.

Let me know if you have any questions about this –

Thanks,
